Proposed Masterplan

5.1 Site Layout Plan

The site varies from 20 storeys to two storeys across the site to create a sense of transition into the low density development surrounding the subject site.

The tallest parts of the plan are in the south west corner, which minimises overshadowing to sensitive areas and the surrounding development.

The open space forms a spine through the precinct, bringing sunlight deep into the development and allowing residents and retail in the local area to spill out into the public realm. This will form the basis of a high amenity, enjoyable new precinct that has a strong sense of local connection to place and one another.

The podium will allow for communal open spaces to form below the tower, providing shared facilities for residents of the building. The configuration around the podium will maximise solar access with towers to the east and west of the envelope, while also providing shelter from wind tunnel effects, with the two storeys above podium to the north and south of the communal open space.
