Dear [REDACTED]

Barton Park Recreational Precinct – Monthly Compliance Inspection 8

Eco Logical Australia (ELA) was commissioned by Ford Civil Contracting (FCC) to conduct monthly site inspections to monitor the effectiveness of management and mitigation measures during the construction period of the works, in accordance with the following plans:

- Green and Golden Bell Frog Management Plan (GGBFMP, ELA 2021)
- Weed Management Plan (WMP, ELA 2022)
- Wetland Environmental Management Plan (WEMP, ELA 2021)

As such, the eighth monthly monitoring inspection was undertaken on 15 September 2023 by ELA Ecologist [REDACTED] [REDACTED]. No Green and Golden Bell Frogs (*Litoria aurea*) (GGBF) were identified on site during the inspection and there are no reports of GGBF sightings from FCC.

The next monitoring inspection is planned to be undertaken in October 2023 by an ELA Ecologist. Should GGBF or any other fauna be identified onsite, ELA are to be contacted immediately for advice and assistance if required.

Regards,

Manager, Restoration Ecology and Land Management
