Welcome

Dear Resident,

We all have a role to play in reducing waste.

Together we can recover more resources for a sustainable Bayside. Your support is vital to reduce the amount of waste going into landfill. You can assist by utilising the correct solutions for your waste and recycling needs. Please use this guide to help you with your household waste and recycling.

Thank you for making a positive contribution to our environment.

If you have any enquiries, please visit Council's website at **www.bayside.nsw.gov.au/waste**, contact us on 1300 581 299 and/or download the free Bayside Waste Services app.

Initiatives

Let's get our waste sorted Bayside.

Help us transform waste into valuable resources by putting the right thing, in the right bin.

Let's sort it Bayside.

Together, we can recover more resources for a sustainable Bayside.

Circular Economy Model

The circular economy aims to reduce waste and maximise resources. This is achieved by moving away from the linear take-make-and-dispose approach to a more circular system.

The circular economy focuses on product design, longevity (life cycle) and renewability. It also considers a product's ability to be reused and and/or repaired, as well as resource recovery.

Council has positioned the community at the centre of the circular economy model. Through responsible citizenship and Council leadership, materials are returned to the community through initiatives and innovation.

The circular model can be easily identified as an '8R' Strategy. When the 8R circular economy model has been applied, any materials not suitable for recovery can be treated to reduce their environmental impact (e.g., medical waste) with a goal to send only a minimal amount of residual waste to be disposed at a landfill.

8R Circular Economy Strategy:

1. Refuse
2. Re-think
3. Reduce
4. Re-use / Re-home
5. Repair / Refurbish
6. Re-purpose
7. Recycle
8. Recover

How the 8R Strategy Works

HIERARCHY	STRATEGY	EXAMPLES
1. Design Smarter product design, manufacture and use	1. Refuse	Producer: design and manufacture problematic waste out. Consumer: avoid using single-use products.
	2. Re-think	Producer: redesign product to prolong use. Consumer: consider sharing the product.
	3. Reduce	Producer: increase material productivity. Consumer: choose products with longer life cycle and reduce food wastage.
2. Consumption Extend the life cycle of the product and/or it's parts	4. Re-use Re-home	Producer: increase material productivity. Consumer: donate and/or use second hand/pre-loved products.
	5. Repair Refurbish	Producer: design products so that they are repairable. Consumer: repair or reupholster items/products.
	6. Re-purpose	Producer: design products so that they can interchange parts easily and/or be used in other functions. Consumer: re-use products but with other function.
3. Return Useful application of materials	7. Recycle	Producer: provide recycling programs to 'buy-back', 'take-back', and/or 'drop-off' used products or its parts at end of life. Consumer: salvage and separate material streams to achieve highest possible value.
	8. Recover	Residual materials: left-over after following 1R-7R should be minimal, and consideration should be made for waste to energy solutions prior to landfilling.

Garden Organics Bin

The Garden Organics bin allows organic material to be collected and recycled easily.

Make sure that all garden organics is placed inside the bin with the lid firmly closed and that no material is presented on top, on the side or sticking out of the bin.

Non-compliant bins may not be collected

Accepted Items

Small Sticks & Twigs
(max 10cm thick)

Weeds & Flowers

Leaves

Plant or Tree Trimmings

Grass Clippings

Rocks & Soil

Gas Bottles

Food & Liquid Waste

Paper & Magazines

Nappies, Wipes & Towels

Polystyrene & Foam

All Types of Batteries

Building Material & Treated Wood

Medical Waste

All General Waste & Plastic

Garden and Food Organics

Home Composting and Worm Farming

Reducing your garden and food waste at home is easy with composting or worm farming. Both methods turn organic materials into nutrient-rich fertiliser, helping to transform food scraps into a valuable resource while keeping them out of landfill where they can generate greenhouse gas emissions.

Whether you live in an apartment or have a backyard, there's a solution to suit your space. Worm farming is a compact option ideal for smaller homes, using worms to break down food scraps and other organic materials into rich fertiliser. Composting, on the other hand, is well suited to households with outdoor areas and allows you to combine food scraps with garden materials such as leaves and prunings.

Save on Composting: Compost Revolution

Ready to get started? Bayside Council has partnered with Compost Revolution to make it easier and more affordable for residents to compost and worm farm at home.

Through this program, Bayside residents can access:

- ▶ Up to 50% off compost bins, worm farms and bokashi systems.
- ▶ Free delivery straight to your door.
- ▶ Helpful tips and support to get you started and keep your system working well.

Whether you live in an apartment or have a backyard, there's a solution to suit your home and lifestyle. **Scan the QR code to get started.**

General Waste Bin

The red-lidded bin is sent to an advanced processing facility where the organic material (food scraps) is mechanically and biologically extracted and turned into compost.

Please make sure your bin is not overweight, the lid is closed and that you dispose of accepted items only.

Kerbside Bin Rules

The placing of incorrect materials in your collection bins is called contamination. Bins that are deemed to be contaminated by our drivers, **WILL BE TAGGED** and may be left unemptied.

Please ensure correct materials are placed in your kerbside bins.

Bins should be placed out **PRIOR TO 4:30am** on your service days, but no earlier than the day prior to your service. Bins should be returned to residents' premises on the day of your service.

Bins left in a public place beyond their service day **MAY BE** removed.

Please **DO NOT** place bins under trees, low power-lines or overhead obstructions.

If bins are obstructed by parked vehicles, collection trucks may be unable to access them and the bins **MAY NOT** be serviced.

Additional material beside or on top of your bin **MAY NOT** be collected.

Bin lids **MUST BE** closed completely; overfilling may result in spillages.

Bins that are overweight **WILL NOT** be serviced.

Jamming material into the bin results in blockages and the bin may only be partially emptied.

Damaged, Missing Bin or Missed Service

If your bin is damaged, stolen or has not been collected, you can report it on Council's website at **www.bayside.nsw.gov.au/waste**, the Bayside Waste Services App or call Council on 1300 581 299.

Scheduled Kerbside Clean Up

The clean-up week in your zone will take place from 6am from the day specified on your waste calendar, Council's website, the Bayside Waste Services App or by calling Council on 1300 581 299. Please follow guidelines to ensure your waste is compliant for removal.

Rules

DO NOT PRESENT earlier than Saturday or later than Sunday before your scheduled collection dates or the day before a paid additional clean up service. It will be treated as illegally dumped material.

3 CUBIC METRES PER HOUSEHOLD ONLY will be collected.

Any extra waste may be deemed as over-presentation and you will have 48 hours to arrange for its removal. If not removed, it will be treated as illegally dumped material and may incur a fine.

All waste must be able to be lifted safely by two people.

NEAT AND CORRECT PLACEMENT of waste may be enforced. Place waste neatly on outer edge of nature strip in front of your property or in the bulky waste room/space available in your multi-unit complex.

DO NOT PLACE material in rear lane ways, in gutters or garden islands. Otherwise, it will be treated as illegally dumped material and may incur a fine.

DO NOT BLOCK pedestrian or vehicular access.

BAG OR BOX all loose and small waste to prevent the potential for wind-blown littering.

BAG, BOX OR TIE green waste and remove spiky thorns.

SEPARATE PILES including mattresses, white goods, metals, e-waste to assist with a more efficient collection service.

LARGE MULTI-UNIT BLOCKS may have a different presentation area on site. Please refer to your building manager for details.

Example of placement of materials on nature strip.

Scheduled Kerbside Clean Up

You are entitled to **4 scheduled kerbside clean ups** throughout the year of ≤ 3 cubic metres to be placed neatly in front of your home or on-site (at specific unit blocks), no earlier than 48 hours prior or up to your specified collection date.

Acceptable Material

- ✓ E-Waste that **does not contain batteries**
- ✓ General household items/ furniture
- ✓ Two (2) mattresses
- ✓ Green waste: bundled/tied/ bagged
- ✓ Small amounts of carpet: rolled/tied
- ✓ Fence palings: remove nails
- ✓ Doors: remove locks and hinges
- ✓ White goods: detach doors

Non-Acceptable Material

- ✗ No batteries or items that contain batteries
- ✗ No glass or mirrors
- ✗ No fibro or asbestos
- ✗ No spiky green waste
- ✗ No gas bottles or fire extinguishers
- ✗ No liquids, chemicals or paint
- ✗ No heavy items (2 person lift)
- ✗ No industrial and commercial waste
- ✗ No food waste (place inside your red bin)
- ✗ No branches >30cm wide or >1m long
- ✗ No sawdust, soil or sand
- ✗ No fibreglass or insulation
- ✗ No demolition material
- ✗ No car parts
- ✗ No tyres
- ✗ No material placed out after the street has been cleared.

For more information about your clean up service including clean up dates and correct presentation, refer to Council's website, the Bayside Waste Services App or call Council on 1300 581 299.

Council waste regulation officers are on patrol for illegal dumpers. Fines apply. If you witness illegal dumping contact Council via the website at www.bayside.nsw.gov.au/waste, the Bayside Waste Services App or call us on 1300 581 29.

Paid Additional Clean Up

To arrange a paid additional clean up service please call Council's Customer Service Centre on 1300 581 299. Please specify the amount and type of waste to be presented and a Customer Service Officer will arrange a mutually suitable booking time for collection.

Please contact Council by Thursday 12pm (noon) to arrange a paid collection service on a particular Friday that is amicably suitable.

For paid clean up fees and charges please scan the QR code on the back of this Guide, refer to **www.bayside.nsw.gov.au/waste**, the Bayside Waste Services App or call us on 1300 581 299.

Compliance

- ▶ **DO NOT PRESENT** earlier than the day before collection. Otherwise, it will be treated as illegally dumped material. Penalties may apply.
- ▶ **NEAT AND CORRECT PLACEMENT** of waste may be enforced. Place waste neatly on outer edge of nature strip in front of your property.
- ▶ **DO NOT PLACE** material in rear lane ways, in gutters or garden islands.
- ▶ **DO NOT BLOCK** pedestrian/vehicular access. Penalties apply.
- ▶ **BAG OR BOX** all loose and small waste to prevent the potential for wind-blown littering.
- ▶ **BAG, BOX OR TIE** green waste and remove any spiky thorns.

Paid Additional Clean Up

Residents Paid Drop Off at Bingo Facilities

In September 2020, Council entered into a contract with BINGO Waste Services, allowing residents to drop off specific general household waste material at their Alexandria and Mortdale facilities at a reduced rate. Please find the location details and operating hours below.

A photo ID and copy of residency is mandatory.

BINGO Industries charges customers a 'per tonne' rate for mixed waste. For loads under one tonne, a minimum fee is applicable. Please check with your local BINGO facility for specific details and any further information.

Opening Hours

Alexandria

76 Burrows Road

Monday to Friday: 6am – 9pm

Saturday: 7am – 1pm

Mortdale

20 Hearne Street

Monday to Friday: 6:30am – 4pm

Saturday: 7:30am – 12pm

For more locations visit the BINGO website at:

Recycling Drop Offs

Council currently holds 22 events per year for Bayside residents and accept a wide range of recyclable material. Refer to your waste calendar, Council's website at www.bayside.nsw.gov.au/waste, the Bayside Waste Services App or call Council on 1300 581 299.

Items Accepted

- ✓ Metals/Whitegoods: items from households that cannot be reused
- ✓ Electronic waste: any battery operated and electronic items (anything with a power cable)
- ✓ Green waste: branches must be bundled and tied, no thicker than 30cm and no longer than 1m
- ✓ Mattresses (max 2)
- ✓ Empty LPG bottles (max 2)
- ✓ Ink toner cartridges
- ✓ X-ray films
- ✓ Expanded polystyrene
- ✓ Car tyres (max 2)
- ✓ Motor oils (<10L)
- ✓ Flattened cardboard
- ✓ All batteries
- ✓ Clothing (re-usable)
- ✓ Fluorescent light globes
- ✓ Plastic writing instruments
- ✓ Plastic plant pots (PP5)
- ✓ Bicycles and scooters
- ✓ Empty blister packs

Please make sure to provide evidence that you live within Bayside Council.

There is a limit of 3 cubic metres or a box trailer equivalent per household for each event.

Items Not Accepted

- ✗ BBQs
- ✗ Smoke detectors
- ✗ X-ray machines
- ✗ Chemical and hazardous waste including paint and fuel
- ✗ Petrol/Diesel
- ✗ Building waste
- ✗ General waste

Recycling Drop Offs

You can find out up to date details about these Recycling Drop Off events on the latest version of your waste calendar. You can also access this information at www.bayside.nsw.gov.au/waste, on the Bayside Waste Services App or call Council on 1300 581 299.

Household Chemicals

NSW EPA Drop Off Services

It can be dangerous to throw away household chemicals in your garbage bin, down drains, toilets or sinks.

Chemicals and pesticides can harm our environment and our health. It is important to make sure that household chemicals are disposed of safely.

Clean out your household's chemical clutter the right way. The safest way to dispose of potentially hazardous household chemicals is through the Household Chemical CleanOut.

It is a **FREE SERVICE** for the safe disposal of a range of common household chemicals, many of which could cause harm if not disposed of correctly.

The NSW EPA conducts monthly drop offs for unwanted chemicals you have around the house. You can deliver up to 20kg or 20L of materials which may include solvents, fluorescent globes/tubes, car batteries, motor oils, paint, gas bottles, fire extinguishers, vapes and pool chemicals.

To find out about this free service, please call 131 555 or visit www.cleanout.com.au

Container Deposit

Did You Know... You can make money from beverage containers? Most 150ml to 3-litre beverage containers are eligible for a 10-cent refund provided they are made from glass, plastic, aluminium, steel or liquid paperboard.

Containers Need To:

- ✓ Be empty.
- ✓ Be uncrushed.
- ✓ Be unbroken.
- ✓ Have the original label intact.

Containers Not Eligible for a 10-cent refund include:

- ✗ Plain milk (or milk substitutes).
- ✗ 1 litre or more of: flavoured milk, pure juice, wine and water casks.
- ✗ Wine and spirits in glass containers.
- ✗ Wine sachets of 250 millilitres or more.
- ✗ Cordials and concentrated fruit/vegetable juices.
- ✗ Registered health tonics.

Nearest Return Points

Take your empty containers to a collection point. An interactive map is available online at www.returnandearn.org.au so you can identify the ones nearest to you.

Safe Disposal of Batteries

All batteries can pose a fire hazard in garbage and recycling trucks, potentially endangering the lives of staff and the community. Bayside Council has experienced several incidents in collection vehicles across different waste streams, including bins and bulky household waste.

To address these risks, Bayside Council is increasing community awareness, providing education, and extensively training staff to quickly identify and safely handle fire hazards caused by batteries. This is crucial to minimise environmental damage, property loss, and potential harm to people and animals.

To help prevent these dangerous situations, we ask that you avoid placing batteries in your domestic waste and recycling bins or in clean up piles. Instead, you can easily recycle your unwanted or used batteries at one of our 22 annual Recycling Drop Off events or at other suitable drop-off points throughout NSW.

To find out more about Council's Recycling Drop Off events, check this waste guide under the 'Recycling Drop Offs' section, or visit Council's website at www.bayside.nsw.gov.au/waste, the Bayside Waste Services App, or contact Council on 1300 581 299.

Alternatively, you can find your nearest battery recycling drop-off point by visiting www.bcycle.com.au and click on 'Find a Drop Off'.

Fire Hazards Caused by Batteries

Take charge.

Keep batteries out of bins and clean-up!

Waste Programs

Littering and Illegal Dumping

To report litter or illegal dumping contact Council via the website at **www.bayside.nsw.gov.au/waste**, the Bayside Waste Services App, or by calling Customer Service on 1300 581 299.

Bayside Council is developing a long-term Litter & Illegal Dumping Prevention Strategy, supported by NSW Government funding. This will guide local actions to reduce waste, prevent dumping, and contribute to state litter reduction targets.

YOU CAN HELP

REDUCE ILLEGAL DUMPING

If you see something, say something.
Scan the QR code or call 1300 581 299.

Illegal Dumping Awareness Programs

After the successful smart solar CCTV trailer trial period, Council continues to use mobile CCTV trailers in illegal dumping hotspot locations.

This program aims to increase surveillance of hotspot locations, reduce incidents and create community awareness.

The CCTV trailers are complemented by an illegal dumping awareness program which includes mailbox drops, community engagement, signage, regular patrols and incident investigations.

Close the Loop

Re-Homing Donated Items

Bayside Council has an agreement with the Bower Reuse & Repairs Centres. You can donate household goods to the Bower, which will either be resold to the community at a low cost, or they will be received by people in need via their 'house to home program'. Please check their web page to find out about the acceptable material.

If they cannot accept or accommodate your donations you can check their reuse database for alternate options. **bower.org.au/collections**

The Bower's in-house repairers have been repairing electronic appliances and furniture for 10 years and want to share their expertise with the community.

You can also attend or participate in the repair workshops (no prior skills are required as experienced facilitators will guide you through) or use their repair services, with details located on their website.

ReLove is another great option for rehoming quality furniture and household items. ReLove rescues items that would otherwise go to landfill and provides them to people in need, helping create homes while reducing waste. **www.relove.org.au**

Repair Old Bikes

Council currently holds **22 Recycling Drop Off Events** per year for Bayside residents.

Bayside Council has partnered with Revolve ReCYCLING as a collection point for unwanted, damaged or unusable bicycles, e-bikes and scooters.

Revolve ReCYCLING located in Alexandria, Sydney specialises in diverting old rides like bicycles, e-bikes, scooters and all other Personal Transport Vehicles (PTVs) from landfill by giving them new life, either by sending them off to be repaired and redeployed or recycled for parts. Revolve ReCYCLING is the first platform in Australia to help riders, bike shops, PTV fleet operators and importers give new life to old rides.

Expert mechanics recondition the redeployed bicycles, ensuring durability and safety. These high-quality bikes, sourced from well-known brands, are sold to the public at an affordable and competitive price.

To find out more about the Revolve ReCYCLING program head over to their website at **<https://revolverecycling.net/about-us>**

How Can Bayside Residents Help?

Residents can keep the wheels of the circular economy turning by saving their old bikes from landfill and dropping them off at one of our Community Recycling Drop Off Events.

To find out more about Council's Recycling Drop Off events including dates and accepted and non-accepted materials, check this waste guide under the 'Recycling Drop Offs' section, or visit Council website at **www.bayside.nsw.gov.au/waste**, the Bayside Waste Services App, or call Council's Customer Service on 1300 581 299.

Waste Education

Schools Program

Bayside Council works with specialist waste educators to deliver waste education programs in our primary schools. This initiative aims to teach students about responsible waste management, recycling practices, and environmental sustainability.

Council also provides compost and worm farming demonstrations to childcare centres as well as to the wider adult community.

If you're interested in receiving waste education workshops, please reach out to the waste education team via email at: sustainablewaste@bayside.nsw.gov.au

These initiatives ensure a comprehensive approach to environmental education across all age groups in our community.

Community Education Initiatives

Each year Bayside Council promotes waste and recycling education at different community events, fairs and information sessions. This may include new innovative trials, community gardens, reuse and re-purpose workshops and volunteer clean up events.

Bayside staff look forward to seeing you at the next event!

Waste Education

Sustainable Fashion Events

Bayside Council hosts various sustainable fashion events including clothes swaps and repair workshops. These events unite the community to reduce textile waste and champion sustainable fashion.

Compost and Worm Farming Workshops

Bayside Council holds hands-on workshops, where residents learn the essentials of composting and worm farming, enhancing garden productivity while reducing waste.

Community Clean Up Events

Bayside Council proudly supports its residents and local businesses throughout the year that register clean up events through Clean Up Australia Day www.cleanup.org.au/cleanupaustaliaday. These events are dedicated to keeping our community and waterways free of litter.
